

Revell's Modelling Colour Range:

Revell is Germany's major modelling paint supplier: A vast choice of 88 colour shades is available in gloss, silk matt, matt, metallic and clear.

'Revell Email Color' paint in the practical 14-ml tins is ideal for painting small areas.

Thinned with 'Revell Color-Mix' (3 parts paint: 2 parts thinner), this paint can also be used for airbrushing.

Important!
It is now possible to apply another coat of paint after only 6 hours! Completely dry after 24 hours!

If you prime well and thoroughly with 'Revell Basic Color' and sand down smoothly before applying paint layer by layer, preferably with an airbrush, you will get a high-quality finish as a result.
